

PARK ROAD ACADEMY PRIMARY SCHOOL

Administering medication Policy 2025 – 2026

Legal framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- Health and Safety at Work etc. Act 1974
- Equality Act 2010
- Children and Families Act 2014
- DfE (2015) 'Supporting pupils at school with medical conditions'
- DfE (2024) 'Early years foundation stage (EYFS) statutory framework'
- DfE (2025) 'Automated external defibrillators (AEDs): a guide for maintained schools and academies'

Roles and responsibilities

The governing body is responsible for:

- The implementation of this policy and procedures, and all corresponding procedures.
- Ensuring that this policy, as written, does not discriminate on any grounds, including the protected characteristics as defined by the Equality Act 2010.
- Ensuring that there is a sufficient number of trained staff available within the school to administer medication based upon the school's risk assessments.
- Ensuring the correct level of insurance is in place for the administration of medication.
- Ensuring that members of staff who administer medication to pupils, or help pupils self-administer, are suitably trained and have access to information needed.
- Ensuring that relevant health and social care professionals are consulted in order to guarantee that pupils taking medication are properly supported.
- Managing any complaints or concerns regarding this policy, the support provided to pupils, or the administration of medication in line with the school's Complaints Procedures Policy.

The headteacher is responsible for:

- The day-to-day implementation and management of this policy and relevant procedures.
- Ensuring that appropriate training is undertaken by staff members administering medication.
- Organising another appropriately trained individual to take over the role of administering medication in case of staff absence.
- Ensuring that all necessary risk assessments are carried out regarding the administration of medication, including for school trips and external activities.

All staff are responsible for:

- Adhering to this policy and supporting pupils to do so.
- Carrying out their duties that arise from this policy fairly and consistently.

Parents are responsible for:

- Keeping the school informed about any changes to their child's health.
- Completing an administering medication parental consent form via school website prior to them or their child bringing any medication into school.
- Discussing medication with their child prior to requesting that a staff member administers the medication.

Training staff

The headteacher will ensure that a sufficient number of staff are suitably trained in administering medication. All staff will undergo basic training on the administering of medication to ensure that, if exceptional circumstances arise where there is no designated administrator of medication available, pupils can still receive their medication from a trained member of staff. The headteacher will also ensure that a sufficient number of staff have been trained in administering medication in an emergency by a healthcare professional.

Where it is a necessary or vital component of their job role, staff will undertake training on administering medication in line with this policy as part of their new starter induction.

Staff will be advised not to agree to taking on the responsibility of administering medication until they have received appropriate training and can make an informed choice. The school will ensure that, as part of their training, staff members are informed that they cannot be required to administer medication to pupils, and that this is entirely voluntary, unless the supporting of pupils with medical conditions is central to their role within the school, e.g. the school nurse.

Training will also cover the appropriate procedures and courses of action with regard to the following exceptional situations:

- The timing of the medication's administration is crucial to the health of the child
- Some technical or medical knowledge is required to administer the medication
- Intimate contact with the pupil is necessary

Staff members will be made aware that if they administer medication to a pupil, they take on a legal responsibility to do so correctly; therefore, staff will be encouraged not to administer medication in the above situations if they do not feel comfortable and confident in doing so, even if they have received training.

Training for administering AAI's

The school will arrange specialist training for staff on a **termly** basis where a pupil in the school has been diagnosed as being at risk of anaphylaxis. Designated staff members with suitable training and confidence in their ability to use AAI's will be appointed to administer this medication. As part of their training, all staff members will be made aware of:

- How to recognise the signs and symptoms of severe allergic reactions and anaphylaxis.
- Where to find AAI's in the case of an emergency.
- How the dosage correlates with the age of the pupil.
- How to respond appropriately to a request for help from another member of staff.
- How to recognise when emergency action is necessary.
- All staff members have administering AAI's training as part of their First Aid training. Additional training is provided by the School Nursing team should we have a child identified as requiring AAI medication.
- How to administer an AAI safely and effectively in the event that there is a delay in response from the designated staff members.
- How to make appropriate records of allergic reactions.

There will be a sufficient number of staff who are trained in and consent to administering AAI's on site at all times.

Receiving, storing and disposing of medication

Receiving prescribed medication from parents

The parents of pupils who need medication administered at school will be sent an administering medication parental consent form to complete and sign; the signed consent form will be returned to the school and appropriately filed before staff can administer medication to pupils under the age of 16. A signed copy of the parental consent form will be kept with the pupil's medication, and no medication will be administered if this consent form is not present. Consent obtained from parents will be renewed annually.

The school will store a reasonable quantity of medication to ensure a child's medical needs are met. Aspirin will not be administered unless the emergency services instruct the school to do so.

Parents will be advised to keep medication provided to the school in the original packaging, complete with instructions as prescribed by a GP. stored in an insulin pen.

Storing pupils' medication

The school will ensure that all medications are kept appropriately, according to the product instructions, and are securely stored. Medication that may be required in emergency circumstances, e.g. asthma inhalers and AAls, will be stored in a way that allows it to be readily accessible to pupils who may need it and can self-administer, and staff members who will need to administer them in emergency situations. All other medication will be stored in the locked First Aid cupboard.

The school will ensure that pupils know where their medication is at all times and are able to access them immediately, e.g. by ensuring that the identities of any key holders to the storage facilities are known by these pupils.

Medication stored in the school will be:

- Kept in the original container alongside the instructions for use.
- A prescription clearly labelled with:
 - The pupil's name.
 - the name of the medication.
 - The correct dosage.
 - The frequency of administration.
 - Any likely side effects.

- The expiry date.

- Medication parental consent form will be record on our online school system.

Medication that does not meet the above criteria will not be administered.

Disposing of pupils' medication

The school will not store surplus or out-of-date medication. Where medication and/or its containers need to be returned to the pupils' doctor or pharmacist, parents will be asked to collect these for this purpose.

Needles and other sharps will be disposed of safely and securely, e.g. using a sharps disposal box.

Administering medication

Medication will only be administered at school if it would be detrimental to the pupil not to do so. Only suitably qualified members of staff will administer controlled drugs. Staff will check the expiry date and maximum dosage of the medication being administered to the pupil each time it is administered, as well as when the previous dose was taken.

Medication will be administered in a private, comfortable environment and, as far as possible. The Pastoral room will be equipped with the following provisions:

- Arrangements for increased privacy where intimate contact is necessary
- Facilities to enable staff members to wash their hands before and after administering medication, and to clean any equipment before and after use if necessary
- Available PPE for use where necessary

Before administering medication, the responsible member of staff should check:

- The pupil's identity.
- That the school possesses written consent from a parent.
- That the medication name, dosage and instructions for use match the details on the consent form.
- That the name on the medication label is the name of the pupil being given the medication.
- That the medication to be given is within its expiry date.
- That the pupil has not already been given the medication within the accepted frequency of dosage.

If there are any concerns surrounding giving medication to a pupil, the medication will not be administered and the school will consult with the pupil's parent or a healthcare professional, documenting any action taken.

If a pupil cannot receive medication in the method supplied, e.g. a capsule cannot be swallowed, written instructions on how to administer the medication must be provided by the pupil's parent, following advice from a healthcare professional.

Where appropriate, pupils will be encouraged to self-administer under the supervision of a staff member, provided that parental consent for this has been obtained. If a pupil refuses to take their medication, staff will not force them to do so, but will follow the procedure agreed upon in their IHPs, and parents will be informed so that alternative options can be considered.

The school will not be held responsible for any side effects that occur when medication is taken correctly.

Written records will be kept of all medication administered to pupils, on edufocus Evolve including the date and time that medication was administered and the name of the staff member responsible.

Non-prescription medicines

The school is aware that pupils may, at some point, suffer from minor illnesses and ailments of a short-term nature, and that, in these circumstances, health professionals are likely to advise parents to purchase over the counter medicines, for example, paracetamol and antihistamines.

The school will work on the premise that parents have the prime responsibility for their child's health and should provide schools and settings with detailed information about their child's medical condition as and when any illness or ailment arises.

To support full attendance the school will consider making arrangements to facilitate the administration of non-prescription medicines following parental request and consent.

Pupils and parents will not be expected to obtain a prescription for over-the-counter medicines as this could impact on their attendance and adversely affect the availability of appointments with local health services due to the imposition of non-urgent appointments being made.

If a pupil is deemed too unwell to be in school, they will be advised to stay at home or parents will be contacted and asked to take them home.

When making arrangements for the administration of non-prescription medicines the school will exercise the same level of care and caution, following the same processes, protocols and procedures as those in place for the administration of prescription medicines.

The school will also ensure that the following requirements are met when agreeing to administer non-prescription medicines.

- Non-prescription medicines will not be administered for longer than is recommended. For example, most pain relief medicines, such as ibuprofen and paracetamol, will be recommended for three days use before medical advice should be sought. Aspirin will not be administered unless prescribed.
- Parents will be asked to bring the medicine in, on at least the first occasion, to enable the appropriate paperwork to be signed by the parent and for a check to be made of the medication details.
- Non-prescription medicines must be supplied in their original container, have instructions for administration, dosage and storage, and be in date. The name of the child can be written on the container by an adult if this helps with identification.
- Only authorised staff who are sufficiently trained will be able to administer non-prescription medicines.

Paracetamol

The school is aware that paracetamol is a common painkiller that is often used by adults and children to treat headaches, stomach ache, earache, cold symptoms, and to bring down a high temperature; however, it also understands that it can be dangerous if appropriate guidelines are not followed and recommended dosages are exceeded.

The school is aware that paracetamol for children is available as a syrup from the age of 2 months; and tablets (including soluble tablets) from the age of 6 years, both of which come in a range of strengths.

The school understands that children need to take a lower dose than adults, depending on their age and sometimes, weight. The school will ensure that authorised staff are fully trained and aware of the NHS advice on how and when to give paracetamol to children, as well as the recommended dosages and strength.

Staff will always check instructions carefully every time they administer any medicine, whether prescribed or not, including paracetamol.

The school will ensure that they have sufficient members of staff who are appropriately trained to manage medicines and health needs as part of their duties.

The written consent of parents will be required in order to administer paracetamol to pupils.

IHPs

For pupils with chronic or long-term conditions and disabilities, an IHP will be developed in liaison with the pupil, their parent, the headteacher, Deputy Headteacher, the SENCO and any relevant medical professionals. When deciding what information should be recorded on an IHP, the following will be considered:

- The medical condition and its triggers, signs, symptoms and treatments
- The pupil's resulting needs, such as medication, including the correct dosage and possible side effects, medical equipment, and dietary requirements
- The specific support needed for the pupil's educational, social and emotional needs
- The level of support needed and whether the pupil will be able to take responsibility for their own health needs
- The type of provision and training that is required, including whether staff can be expected to fulfil the support necessary as part of their role
- Which staff members need to be aware of the pupil's condition
- Arrangements for receiving parental consent to administer medication
- Separate arrangements which may be required for out-of-school trips and external activities
- Which staff member can fulfil the role of being a designated, entrusted individual to whom confidentiality issues are raised
- What to do in an emergency, including whom to contact and contingency arrangements
- What is defined as an emergency, including the signs and symptoms that staff members should look out for

Educational trips and visits

In the event of educational trips and visits which involve leaving the school premises, medication and medical devices will continue to be readily available to staff and pupils.

There will be at least one staff member who is trained to administer medication on every out-of-school trip or visit which pupils with medical conditions will attend. Staff members will ensure that they are aware of any pupils who will need medication administered during the trip or visit, and will ensure that they know the correct procedure, e.g. timing and dosage, for administering their medication.

If the out-of-school trip or visit will be over an extended period of time, e.g. an overnight stay, a record will be kept of the frequency at which pupils need to take their medication, and any other information that may be relevant. This record will be kept by a designated trained staff member who is present on the trip and can manage the administration of medication.

All staff members, volunteers and other adults present on out-of-school trips and visits will be made aware of the actions to take in a medical emergency related to the specific medical needs and conditions of the pupil, e.g. what to do if an epileptic pupil has a seizure.

Medical emergencies

Medical emergencies will be handled in line with the First Aid Policy.

For all emergency medication stored by the school, the school will ensure it is readily accessible to staff and the pupil who requires it, and is not locked away. For all emergency medication kept in the possession of a pupil, e.g. AAls, the school will ensure that pupils are told to keep the appropriate instructions with the medication at all times. A spare copy of these instructions will be kept by the school in the school nurse's office.
